

FINSOLV® BOD*

INCI NAME: *OCTYL DODECYL BENZOATE*

INTRODUCTION

FINSOLV® BOD is the highest molecular weight product in the hydrophobic group of **FINSOLV Benzoate Esters**. It confers the most apparent feel or "cushion" and is most useful when an elegant, non-greasy afterfeel is desirable.

Like the other **FINSOLV Benzoate Esters**, **FINSOLV BOD** displays low toxicity, high spreading coefficient and excellent solubilization of cosmetic ingredients including sunscreens and fragrance oils. In the latter case, **FINSOLV BOD** can serve as a fixative and extender.

CAS Registry Number : 108347-89-3

TYPICAL PROPERTIES (Not intended as specifications)

ACTIVES	100%
APPEARANCE	Clear liquid
ODOR	Practically odorless
REQUIRED HLB	12 - 13
VISCOSITY, 25°C	45 cps
SPREADING COEFFICIENT @ 21°C	32.1 dynes/cm

TOXICOLOGY

Ocular Irritation (Rabbits)	Practically Non-irritating
Primary Skin Irritation	0.77
